JAMG HE TPU Filament Yellow 1.75mm

Read More

SKU: 3DW147QY6ZS9N

Price: 230.00 DH

Stock: instock

Categories: Filament TPU, Filaments 3D

Product Description

95A Shore Hardness

Soft Adhesive Material, boasting a 95A hardness, filament tpu combines high resilience, exceptional glossiness, and elasticity for optimal results. Harder and easier to print than standard TPU, it delivers precise, durable outputs with minimal warping

JAMGHE TPU filament features easy printing and excellent coating adhesion; It is resistant to oil, grease and abrasion. Ideal for projects such as shoe soles, watch straps or drone parts

Compatible with most high speed 3d printer like Bambulab, Creality, ELEGOO, and also with other regular 3d printer.

Product Description

Description : Le filament eFlex TPU-87A d'eSUN est l'option idéale pour les modèles imprimés exposés à des contraintes mécaniques et des chocs. Ce matériau offre une incroyable flexibilité et une grande résistance, pouvant être étiré de multiples fois avant de se rompre. De plus, il affiche une durabilité exceptionnelle. Atouts :

- Grande souplesse
- Résistance élevée aux chocs
- Allongement à la rupture élevé

TPU

Filament 3D FILA+ Flexible TPU Noir 1.75mm 1kg

Choisissez la facilité d'impression avec ce filament ABS haut de gamme. Ce filament ABS est plus solide et plus résistant aux chocs que le filament ABS classique. Facile à imprimer grâce à sa déformation limitée. Les filaments Fila + possèdent des tolérances très serrées de diamètre ainsi qu'une excellente rondeur. C'est aussi un fil solide, léger et durable qui vous permet d'obtenir des niveaux d'impression très stables. L'utilisation du plateau chauffant à ± 90-110˚C est recommandée par le fabricant.

Product Description

FEATURE Color: Black Brand : FILA+ Weight: 1KG (approximately 2.2 lbs) Diameter: 1.75mm(Dimensional Accuracy +/- 0.05mm) Recommended Extrusion/Nozzle Temperature: 220°C - 260°C Bubble: no-bubble BENIFIT TPU (Thermoplastic Polyurethane) is a subclass of thermoplastics which prints strong parts that are also flexible. Compatible with all FDM printers on the market that accept 1.75 mm filament. Including Prusa I 3, Monoprice MakerSelect, SainSmart xCreality, WanHao & Qidi, and other RepRap printers. With proper settings, TPU is easy to print thanks to excellent bed adhesion and the filament’s tendency to not warp. Great for a variety of projects, such as shoe insoles, watch bands, phone cases, drone parts and more! Quality You Can Trust High Purity: TPU is flexible, shape can be changed by external force and bounce back when the force disappears. Strong Toughness: Manufactured to very tight tolerances and a wide extruder temperature range, high hardness, making for smoother 3D printing, and fewer extruder nozzle problems. High Compatibility: To be applied to a variety of FDM 3D printer, Makerbot, UP plus, Mendel, Prusa, series, etc. Healthy: All of products have passed the RoHS Directive, made by 100% polylactic acid. Density is small, when printing larger volume model lighter, economical.
