Product Description

CREALITY 3D Sprite Extruder Pro Dual Gear Feeding (All Metal) Design 3.5: 1 Gear Ratio for CREALITY Ender-3 Series, Ender-3 S1 / Ender 3 S1 Pro / CR-10 Smart Pro 3D Printer.

- Compact and Lightweight, 3.5: 1 Gear Ratio, All-metal Design. - Upgrading Ender 3 S1 Extruder to Sprite Extruder Pro. It's a drop in upgrade to Ender 3 S1 and CR 10 Smart Pro. - **Ender 3, 3 Pro, 3 V2, 3 Max and CR10 will require full upgrade kit.**

Unboxing and Installation

Features:

- Small sprite, huge power 54*50*64.3mm small size. Exquisite design, perfect combination of extruder and printing hotend make more powerful functions. - Large torque Extrusion forces up to 80N The use of gear with 3;5;1 gear ratio which perfectly matches with motor makes extrusion force up to 80N (depening on filaments). More precise control of feeding withdrawal. - Efficient heat dissipation, Worry-free printing Simulation of flow field mechanics and dual fan design results in powerful heat dissipation function and more stable model formation. Air-cooled and water-cooled heat dissipation modules can be quickly switched.
