Product Description

Application ①Casting the coping and substructure ②Casting the full contour ③Casting the removable partial frame ④ casting Rapid printing: the exposure time on a 4K mono printer is only 2.5s per layer, 110 crowns are printed within 40mins, and 7 partial denture frames are printed within 2.5 hours High precision: smooth surface, this resin can perfectly restore the design details of the digital models, the tolerance is $\pm 50\mu\text{m}$ Easy casting After printing and curing, it's high deformation resistant, easy casting, no residue after casting, and good surface effect. Small expansion coefficient Resin thermal expansion coefficient is low, suitable for casting fine structure objects, high adhesion degree after casting.
