SKU: 3DW2Y8AVQLY9J

Price: 80.00 DH

Stock: instock

Categories: [Spare Parts](#)

Product Description

The proximity switch is a high-frequency oscillation type, which sends a detection signal quickly, without pressure, no pressure, without a spark, to drive the relay or logic gate. It has high sensitivity, fast frequency response, high repeatability, Short, the output power is large, the anti-jamming performance is good, the working stability is reliable, the service life is long and so on. The switch is filled with resin to make it completely closed, and it has the characteristics of vibration resistance, corrosion resistance and waterproofing.

Specification:

Color: Black, Blue

Rated Current: 0.4A

Rated Voltage: 10-30V

Sensing Distance: 4mm

Response Frequency: 500Hz

3C rated voltage range: 440V and below

Package includes:

1 x Proximity Switch Sensor
