Product Description

- Product name: Filament Detection Module
- Material: Plastic
- Applicable filament diameter: 1.75mm
- Total Size: (L×W×H) 37.6×30.2×13mm(Approx.)
- Cable Length: 1m (Approx.)

Features:

1. Suitable for testing 1.75mm filament
2. Added a wear-resistant copper sleeve, can effectively extend product life

Package Included:

- 1x 1.75mm Filament Detection Module
- 1x Connection Cable

Used with Lerdge board: When there is filament in, the green light in the module keeps lighting. And when the filament is exhausted, the green light goes off, then the motherboard executes the pause command operation, after the replacement of the filament can continue to print. Wiring: Connect the module to the M-sensor port on the motherboard.
