Product Description

Main Features:

- Original Monochrome 2K LCD screen used on ELEGOO **Mars 2** and **Mars 2 Pro** 3D Printers.
- 6 inches LCD with 1620×2560 high resolution ensures your printing with high precision.
- Four times longer in lifespan and two times faster in printing speed than the regular RGB LCD 3D printers, which means higher printing efficiency, more stable performance, and less maintenance.
- Assembly of the 2K LCD screen is straightforward and easy. (See tutorial video links in the description below)
- The 2K LCD screen kit is well-protected with an anti-static PE foam package in the box.
